WHATEVER YOU SPILL

Substances

OILEX absorbs the following substances¹

OILS

100% ABSORPTION

Crude oil, heavy fuel oil, marine fuel oil, engine oil, heating oil, hydraulic oil, oil-based lubricants, liquid paraffin, petroleum, kitchen oil and animal oil

FUELS

100% ABSORPTION

Benzine, petrol, diesel, kerosene and aviation fuels

CHEMICALS

100% ABSORPTION

Alcoholic substances, organic solvents, polychlorinated biphenyls (PCBs), styrenes, turpentine and petroleum ether

OTHERS

100% ABSORPTION

Oil-based colors and lacks, dyes, anti-freeze fluids, brake fluids, coolants as well as blood

¹ The OILEX binding agent is 100% organic, consisting of a hydrophobic biogenic sediment. The technical data may therefore vary slightly, depending on the substances that have to be absorbed. It may be necessary to manually knead in / work in the binding agent.

When the Emulsion is stabilized, the water content cannot be separated from the oil. The entire emulsion has to be absorbed by manually kneading in / working in OILEX. When the emulsion is not stabilized, the oil can be separated and absorbed.
